EDUCATION

Bachelor of Scientific Computing, Faculty of
computer science , Ain Shams University, GPA: 3.0

2020 – 2024 | Cairo, Egypt

SKILLS

Data Engineering: ETL/ELT Pipelines, Data Modeling, Data Warehousing, Data Lakes, DataOps, Orchestration, Data Governance, Monitoring

Cloud & IaC: AWS (S3, Glue, Kinesis, Redshift, Cloud watch), Terraform, GCP(Vertex AI, Cloud Functions)

Tools & Frameworks: Apache Airflow, Apache Spark, Apache Flink, DBT, Git, GitHub, Docker, Power BI, Excel, TensorFlow, Keras

Databases & Storage: Relational Databases, NoSQL Databases, Vector Databases, Object Storage

Machine Learning & AI: Machine Learning, Hugging Face, Generative AI, RAG, NLP

Programming & Concepts: Python, Java, SQL, NodeJS, OOP Concepts, API Integration

WORK EXPERIENCE

AI Engineer Intern, Inno_Tech-sa

Jan 2025 – May 2025 | Riyadh

- Implemented AI-driven chatbots for our website using simple RAG using GCP. These chatbot significantly reduced overhead support by automating customer interactions.
- Built a fully automated IELTS Listening Exam Simulator using Gemini for text generation and answer evaluation, paired with open-source TTS for realistic audio generation.

Data Analyst intern, Eden Tech.

Jul 2024 – Aug 2024 | Remote

Gained experience using Apache NiFi as an ETL tool to extract, transform, and load data efficiently. Created insightful visualizations using Power BI to aid in data-driven decision-making and streamline analytical workflows.

PROJECTS

IELTS Exam Generator

- Developing an IELTS Listening Exam Simulator using generative AI (Gemini) to create realistic listening passages and exam questions.
- Leveraging an open-source Text-to-Speech (TTS) model to generate natural-sounding audio, closely simulating real exam conditions.
- Integrating Gemini-powered AI evaluation tools to assess student responses and deliver automated, personalized feedback, enhancing learning outcomes

Chatbot Development for Websites and Applications

- Designed and implemented AI chatbots using Google Cloud services, Dialogflow CX, and Cloud Functions, with tailored flows for registered and unregistered users.
- Integrated external APIs to securely retrieve sensitive customer information, enhancing user experience and reducing support overhead.

CERTIFICATES

Python Fundamentals [IBM] ↗	Data Engineering Professional Certificate [Deeplearning.ai]	Machine Learning Specialization [Deeplearning.ai] ↗	Data Wrangling, AB Testing with SQL [UC Davis] ↗
SQL for Data Analysis ↗	Excel ↗	Linux Fundamentals ↗	

VOLUNTEERING EXPERIENCE

AISEC Volunteering, Event Organizer (Logistics team member)	2023 – 2024
<i>Responsibilities:</i> Oversaw panel stage setup and management, ensuring smooth operations and optimal speaker and audience experience. Coordinated logistics to support event flow and facilitated efficient transitions during the sessions.	

LANGUAGES

Arabic: (Native)	English IELTS Total Score: 7.0 (B2)
